

My Projects Tutorial

Product Configurator

www.blum.com

 **blum**[®]

In this tutorial, you will learn how to manage projects in the Product Configurator.

1.
Click
Product Configurator.

We will be using AVENTOS HS as an example.

2.
Click
Lift Systems.

Use the information on this screen to decide if you need to build a Quick Configuration or a Detailed Configuration. Then proceed to fill out the information about your application.

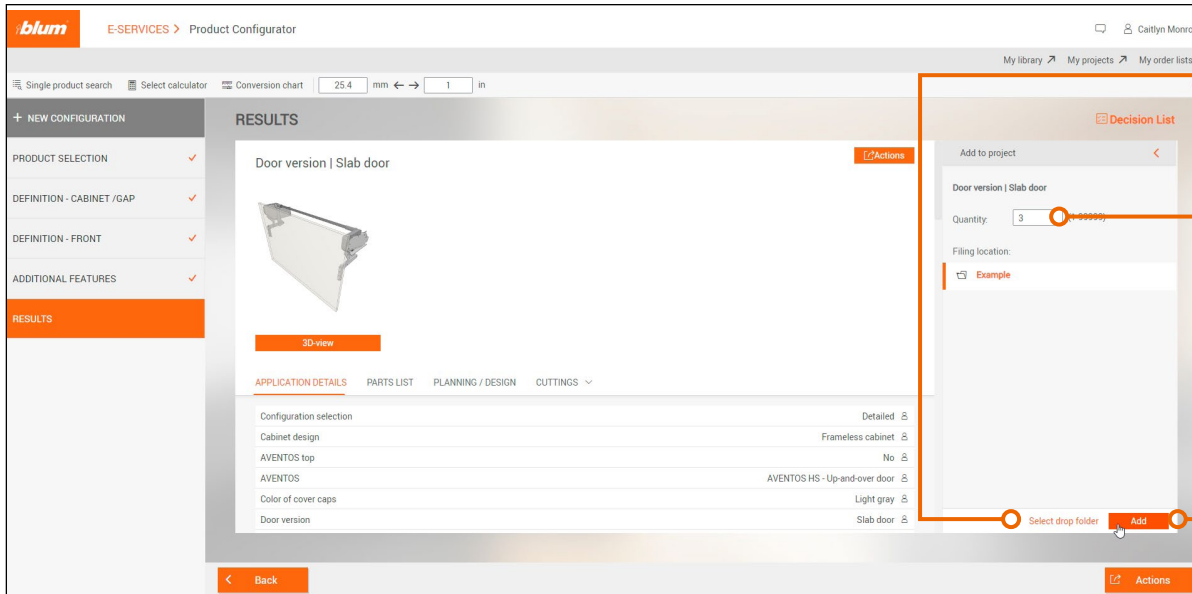

3. Choose Quick or Detailed.

4. Click To Results.

Once on the results page, click on the 'Add to project' option in the Actions window to the right of the screen.

5. Click Add to project.

Select your desired project folder or create a new folder with the 'Select drop folder' button. Once the desired project folder is selected, you can adjust the quantity based on what you need for your project. Click 'Add'.

6. Click **Select drop folder**.

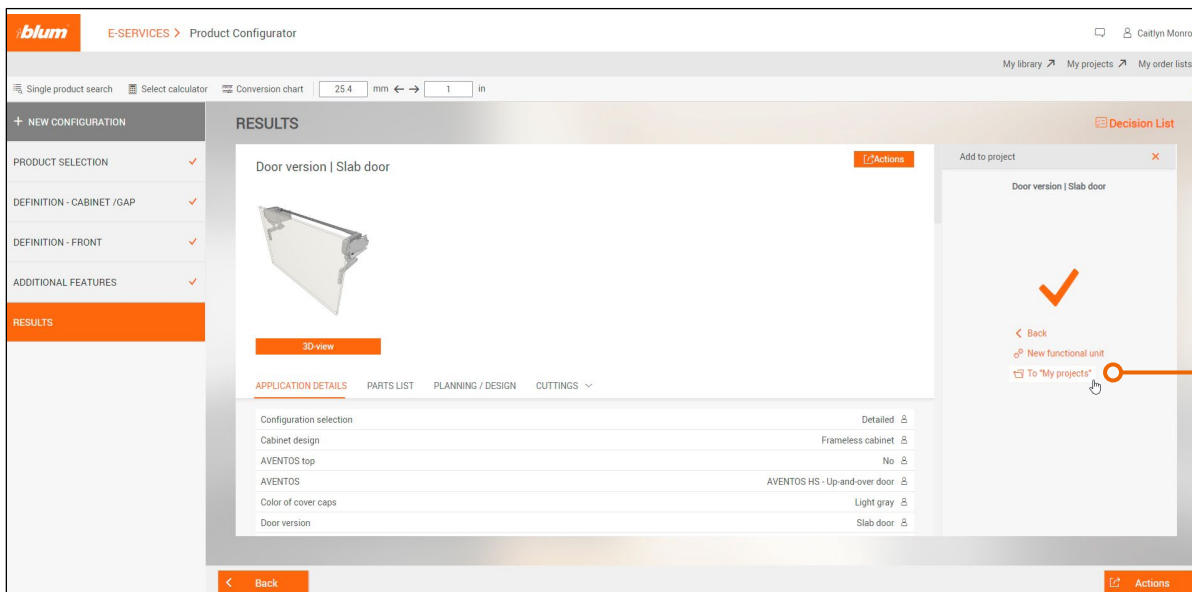

7. Enter desired amount in **Quantity** field.

8. Click **Add**.

If you adjusted the Quantity from 1 to a higher number, you will be able to see the accumulated parts list within the desired folder by clicking on the Planning Results tab in the toolbar of My Projects.

To view your newly saved application, click on "To 'My projects' ".

9. Click **"To My Projects"** to view saved project.

Once in the My Project feature, you can view your application details by clicking on it. The details will appear in a window to the right of the screen. This is also how you can load the configuration and view the planning results.

10. Click on **Application** to view your application details.

11. Click **Load**.

Load configuration – this will bring you back into the Product Configurator to the results page for you to make changes, resave, or add as a library entry.

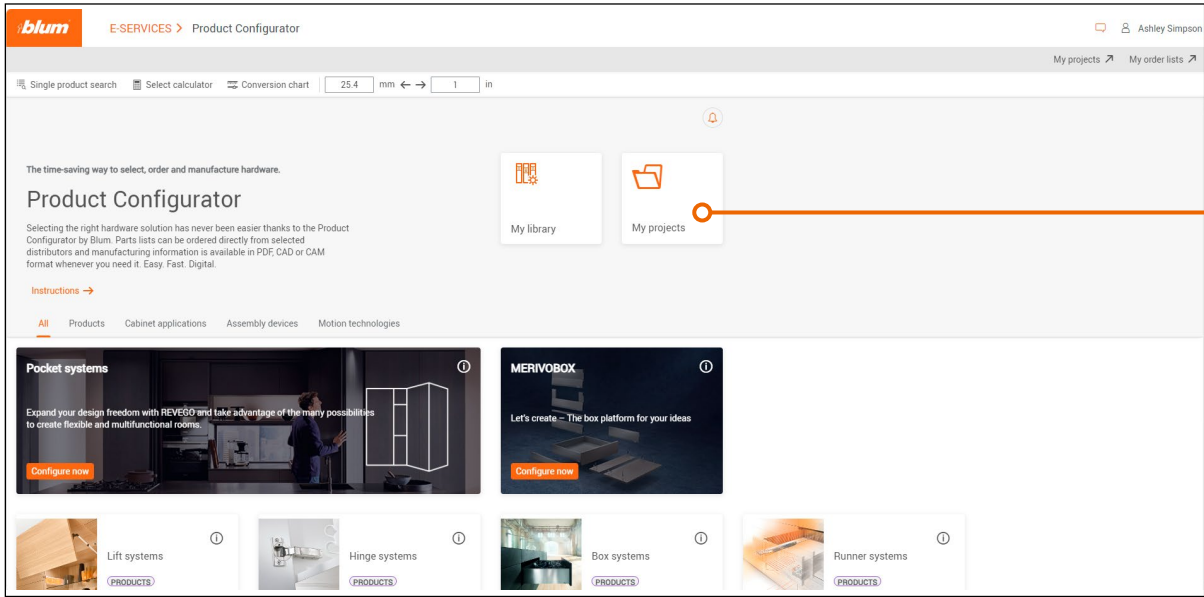

By selecting a folder, you can rename, copy, and delete it, as well as view the accumulated parts list in the planning results and share the project folder with another E-SERVICES user.

12. Toolbar allows you to "rename, copy, delete, share, and more".

To share a folder or application through the My Projects feature, the other person must have an E-SERVICES account. You cannot copy and paste the URL.

You have successfully learned how to add/manage applications in the My Projects feature.

13.
Configuration
now saved to
"My Projects".
